DVT PREVENTION PROGRAM

INTRODUCING THE DVT HOME UNIT

YOUR DOCTOR HAS PRESCRIBED THE **DVT HOME UNIT**...

WHAT IS THE **DVT HOME UNIT**?

The DVT Home Unit is a portable pump with two calf wraps that provide alternating, recurring compression to prevent DVT. It comes equipped with easy to use, one touch technology that lets you adjust the compression to your comfort level or doctor's recommendations.

WHAT IS A **DVT** & HOW DO I PREVENT IT?

Deep Vein Thrombosis (DVT) occurs when a blood clot forms in a vein deep inside a muscle. Blood clots occur when blood fails to flow appropriately and it thickens and clumps together. The DVT Home Unit calf wraps will mimic walking and increase blood flow with air pressure.

DO I HAVE TO PAY FOR MY **DVT HOME UNIT**?

Your insurance will be billed for this product. You may be responsible for co-pay or deductible payments for which you would receive an invoice.

IF YOU HAVE ANY TECHNICAL QUESTIONS OR CONCERNS REGARDING YOUR DVT HOME UNIT, CONTACT (800) 994-0464.

HOW DO I GET MY **DVT HOME UNIT**?

1

Prior to your surgery, our local representative will set you up with the DVT Home Unit.

2

If you have any questions or concerns, our local representative will be able to answer them and explain how to correctly use your DVT Home Unit.

3

Once you are at home, please use the DVT Home Unit any time you are at rest or not walking. Recommended length of use is one to two weeks after your procedure depending on your physician's protocol.

IF YOU HAVE ANY QUESTIONS REGARDING BILLING OR PRESCRIPTION LENGTH, PLEASE CONTACT
